

# KIRF: I know number bonds to 20.

Number bonds show us how numbers join together. They are very important for addition and subtraction. This half term, the children will be learning number bonds that make 20; they should be able to recall these independently.

## What can this look like

Concrete

Pictorial

Abstract

1 + 19	6 + 14
2 + 18	7 + 13
3 + 17	8 + 12
4 + 16	9 + 11
5 + 15	10 + 10

## Questions

- What do we need to **add** to 13 to make 20?
- If I have 10, how many **more** do I need to get to 20?
- What is the **difference** between 20 and 12?

## Key Vocabulary

- 12 **add** 8 equals 20
- 18 **plus** 2 is the **same as** 20
- 20 **take away** 7 equals 13
- 20 **subtract** 3 makes 17
- 20 **minus** 9 equals 11

## Activity Ideas

**Chants-** Practice chanting the number bonds.

**Paper Chains-** Use two different colours to make paper chains to show each number bond, for example  $14 + 6$  could be shown as 14 green links and 6 blue links.

**Say it, make it, write it-** For each number bond, say it out loud, make it using everyday objects and then write it as a sum.

**Pegs** - Put 20 pegs on to a coat hanger, split them in different ways and count how many pegs are on each side. E.g.  $14 \text{ pegs} + 6 \text{ pegs} = 20 \text{ pegs}$  ( $14+6=20$ ).
